Dear PARC,

Thankyou for your partership deticated to the conservation of the herpetfauna, and other habitats. I heard that PARC is the most comprehensive conservation ever undertaken for amphibians and reptiles. I spend a lot of time around snakes. Your hard work have helped animals a lot.

Thank you so much for making homes for the reptiles that lost their homes in the habitat. You found a place far from the city that help the reptile couldn't be scared and run away. And you guys agreed with the government that you made a sacrifice for these reptiles so they can have a home. Of you did something that will change the future on these reptiles. If you take care of your land these reptiles will still be here after us. So thank you for keeping these animals alive.
